To whom it may concern,

I am recommending Mr. Alikhan Behzad regarding his application for his graduate degree application.

Behzad has joined Computer Science Faculty at Kabul Polytechnic University in 2016 and successfully graduated in 2019. I have been teaching him several courses and evaluated him against many assignments and exams. He had and kept the highest performance among his cohort. He showed dedication and hardworking towards his studies. He has completed all assignments and passed all exams successfully. In the courses I have taught him, i.e. computer networks and Java Programming, he did well and obtained a good grade.

In addition, he is a decent, and hardworking student with a great capacity to confront with conceptual challenges for the purpose of devising a solution. He has exercised to work in groups, and adapting under different circumstances that he may face during his studies.

As his instructor, I pleasantly recommend him to the selection authority of applicants where he submits his application.

For any inquiries, I am contactable through the details provided above.

Ali Aqa Naseri

Computer Science Lecturer at Kabul Polytechnic University, and
Adjunct Instructor of IT at the American University of Afghanistan
